SUMMARY

I am a passionate and results-driven IT student specializing in full-stack development, with strong skills in technologies like React.js, Next.js, MongoDB, and more. I have proven my capabilities through successful projects and have been recognized in hackathons for my innovative approach. I am eager to gain industry experience and aim to initiate my own tech-driven startups in the future

EXPERIENCE

Software Development Intern

06/2024 - 08/2024

Unified Mentor

Unified Mentor is an organization focusing on developing software skills for students

- Developed and deployed two major projects as part of the internship
- Built CruiseEase - a cruise management platform with secure authentication and real-time bookings
- Designed Safe-Radius - a secure POI management system with JWT-based authentication

EDUCATION
